EDUCATION
CENTRE

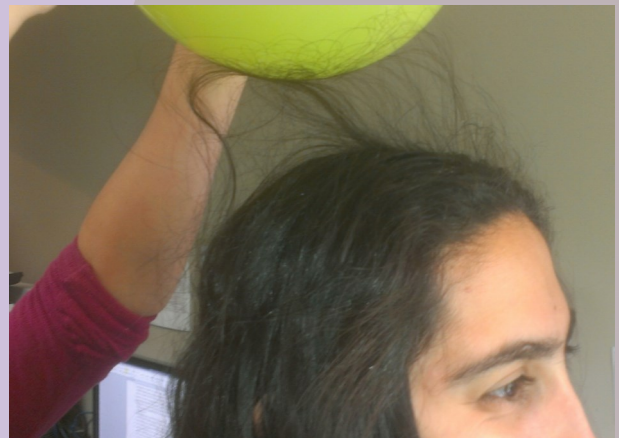

Serious Science!

Let VSSEC take your class on an exploration of electricity.

Static electricity activities are notoriously prone to the effects of weather and humidity. We remove the uncertainty for you. Our educators make sure your class gains a basic understanding of an area which primary schools find challenging to teach.

The program has two parts:

Static Electricity. Students use balloons, fur, wool, PVC and acrylic to explore the mysterious nature of electric charge. They use a Van De Graff generator wand to control a flying mylar shape, using the repulsion of like charges.

Dancing Alien Robots. Students build a simple circuit which includes an electric motor. They use this to power the dancing alien robot which they create.

This program works well in conjunction with the Primary Expedition to the M.A.R.S. Base.

Year levels: Year 5 & 6

Cost: \$10 per student plus GST. (Interstate and international students P.O.A. Please ask if your school is eligible for a subsidy.)

***This program is designed for 1 class per half day ***

Times: 9:00am -12:00pm or 12:00pm - 3:00pm

This program can be booked in conjunction with the *Primary Mission to the M.A.R.S. Base* to make a complete day of activities for two classes at a cost of \$20 per student plus GST
