The program includes:

- Review of units 3 & 4 by Mr. Christopher Dwyer including the exam and student performance.
- An introduction to the experiments presented by Strathmore Secondary College teacher, Dr. Chris Kladis
- Analysis of Water Samples by Atomic Absorption Spectroscopy
- Analysis of Aspirin by UV-Visible Spectroscopy
- Determination of Alcohol content by Gas Chromatograph

Agilent Technologies Agilent staff will work with teachers to share their in-depth knowledge and experience in operating the machines and interpreting the results.

Teachers attending this program will receive a 10% discount off all 2013 VCE Analytical Chemistry Programs.

Date: Wednesday 5th December 2012
